Simple templates make it easy to put a project together.

Click Create Project to build or edit a template in the format you want, or use the 100-plus varied free templates offered by Kkurum-e to create the project you need quickly and easily.

Kkurum-e templates are updated continuously.

Communicate with your team members in real time and write documents together.

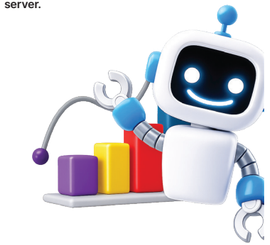

Team members can write and edit project files together in real time, and the video conferencing feature keeps project work going even when everyone is apart. When it is hard to talk with your team members, the chat feature lets you stay in touch.

Documents written together with your team members are saved automatically to the cloud server.

The Kkurum-e AI assistant system lets you check your team members' participation level in a project.

Quantified metrics show you how hard your team members are working on the project. The Kkurum-e AI assistant system is widely loved by teachers, who put it to use in process-based assessment.

What is more, with the newly added video conferencing feature, Kkurum-e recognizes team members' faces to give you even more accurate information.

Every project can be saved or printed as a PDF and used as a portfolio.

Save your finished project as a PDF to share the file with others, or print it out and put it to use in many ways, from a research journal to a portfolio.

Search for materials with the AI Tutor feature right inside the Kkurum-e program.

When you need to look something up or a question comes to mind during a project, there is no longer any need to ask a busy teacher or run a separate search on a portal site.

With the AI Tutor search feature in Kkurum-e, you can find the information you want quickly and easily.

For Everyone

'Streamlined Work'

Teacher → Lesson Prep → Real-time Feedback → Evaluation

> With the 100-plus templates Kkurum-e provides, I can cut down lesson preparation time, and I can use the project participation level metrics of the students taking part in each project as material for process-based assessment.

'Active Learning'

Real-time Collaboration → AI Tutor → Assignment Submission → Student

> We work together through simultaneous document editing, chat and video conferencing, write up our project with the Gemini search feature, and then download the finished log as a PDF or print it to use as a portfolio.

Kkurum-e 4.0 adds three new features that make use of project data.

Kkurum-e 4.0 introduces three new features powered by project data.

Reflection Journal

Students write a reflection journal to look back on the day's lesson and their learning process.

AI School Record

Based on project data, it automatically drafts the school record in line with the Ministry of Education's school record guidelines and rules.

AI Process-Based Assessment

Based on project data, it carries out assessment by combining the principles of BLOOM X MERRILL.
