

ALTINO NEO·LITE INTRODUCTION

Coding Learning with Altino

Altino is an autonomous driving AI robot that allows various coding education from 7 years old to adults. Start easy and fun coding with Altino, which aims to achieve autonomous driving missions and enhances problem-solving and creativity through problem-solving simulations.

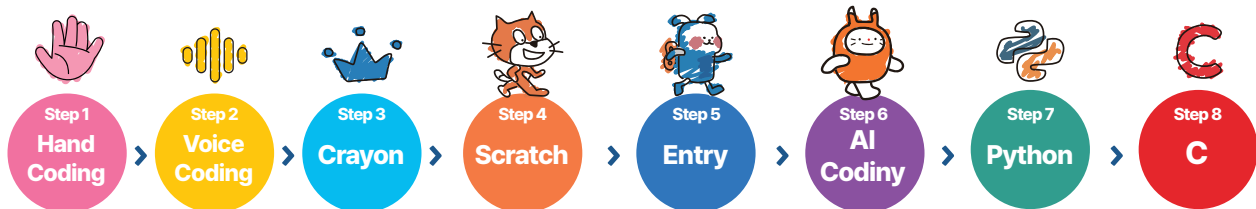

Problem Analysis Ability

Computational Thinking

altino neo

altino lite

- 01 You can experience the automobile functions while coding for self-driving.
- 02 You can see immediate results from the car when it recognizes its surroundings.
- 03 You can communicate to ALTINO LITE through AI speech recognition.
- 04 You can play with ALTINO LITE like an RC car, as it is made of solid exterior materials.
- 05 You can learn coding with 5 different programming languages.
- 06 You can code anywhere with a program that is available on PCs, tablets, and smartphones.
