Colorlooon Co., Ltd.

From coloring to real play.

Company Overview

Colorlooon Co., Ltd. is a Korean venture company specializing in creative educational play products that connect coloring activities with real, physical play experiences for children.

All Colorlooon products are **designed, developed, and manufactured in Korea**, with a strong focus on safety, quality, and long-term educational value.

With an in-house R&D Center and multiple patents, Colorlooon continues to build innovative play experiences trusted by global partners and markets.

Brand Story & Core Concept

Most coloring activities end the moment the coloring is finished. Colorlooon begins exactly where coloring usually stops.

Children color their own designs, inflate them with air, and transform flat drawings into three-dimensional toys they can hold, move, and play with.

This simple but powerful transformation —**Color. Inflate. Play.**— is the heart of the Colorlooon brand philosophy.

Colorlooon believes children are not just users of toys, but **creators of their own play experiences**.

What Makes Colorlooon Different

★ A clear and repeatable play structure

Color → Inflate → Play, turning 2D creativity into engaging 3D physical play

★ Designed to support child development

Encouraging creativity, focus, confidence, and imagination through hands-on play

★ Certified safety and quality standards

Tested to global toy safety standards including KC, ASTM, and EN 71

★ A scalable and consistent brand system

Vehicles, dinosaurs, characters, masks, and LED play items within one unified structure

★ Built for global markets

Trusted by partners across the USA, Europe, the Middle East, and Asia

**HOW
TO
PLAY**
